

## OneSpan Named a Leader in The Aragon Research Globe™ for Digital Transaction Management, 2023

June 28, 2023

CHICAGO--(BUSINESS WIRE)-- OneSpan™ (NASDAQ: OSPN), the digital agreements security company, today announced it has been named a leader in The Aragon Research Globe™ for Digital Transaction Management, 2023, based on a review of 20 major Digital Transaction Management (DTM) providers by the independent research and advisory firm.

In the report, Aragon Research explores the ongoing shift from paper-based transactions to digital processes and key trends that are shaping the future of the market. While the DTM market is still growing, an increased focus from providers to “offer more advanced DTM capabilities,” ones that include “identity and security” and “go beyond just e-signatures,” is expected. The report also states, “as the cyber war continues to grow, OneSpan’s focus on security and identity will help to differentiate it in the overall DTM Market.”

“Today businesses run on digital agreements, which will continue to gain momentum as we embrace Web3. To secure these digital agreements, we have a responsibility to move beyond basic digital transaction management solutions and embrace capabilities like continuous identity verification and authentication to ensure a seamless and secure customer experience through the lifecycle of all digital interactions and transactions,” said Sameer Hajarnis, Chief Product Officer at OneSpan. “It’s an honor to be named a leader in Aragon Research’s annual report. Our dedication to delivering secure technologies and services across a broad portfolio of offerings around e-signatures will allow us to continue pushing boundaries for our customers.”

OneSpan’s unique position in the market centers around the company’s strong foundation in security and dedication to delivering secure technologies and services. The OneSpan Transaction Cloud Platform offers e-signature, identity verification, authentication, high-assurance virtual collaboration, and secure vaulting. Over the past year, OneSpan has introduced a variety of new solutions and capabilities to help enterprises protect the integrity of their business processes without undermining the customer experience. OneSpan launched [OneSpan Notary](#) earlier this year and [recently announced](#) expanded features that support Remote Online Notarization (RON) identity-proofing requirements to securely identify signers unknown to the notary. With the eNotary market gaining traction, there’s been a renewed focus on the ability to verify people as part of the transaction process and OneSpan is at the forefront of providing these capabilities.

“OneSpan’s focus on security and identity helps to differentiate it in the digital transaction management market,” said Aragon Research, CEO and Lead Analyst, Jim Lundy. “OneSpan’s goal of continuing to expand its footprint for secure transactions is evident.”
